

Play all the Angles

Use your whole body to consolidate angle and shape knowledge – not just your head!

SCT - Shape, Position and Movement (all levels)

ENG/WAL –Geometry – Properties of Shapes (all levels)

NIR – Shape and Space (all levels)

IRL – Shape and Space (al levels)

Activity ideas from basic to more challenging

- Use sticks to create different regular and irregular shapes.
- Use sticks and colour coded blocks to demonstrate acute, obtuse and right angles. Then attempt to make those angles with your body labelling them with the same blocks.
- Try out some angle aerobics in which pupils turn clockwise or anticlockwise a quarter (90°), half (180°) or full turn (360°). Make it into a 'Simon Say's game and throw in some shapes.
- Work in teams to create different regular shapes and label the angle measurements within the shapes using white boards and markers.

What you need:

- Any long straight lengths of wood
- Different coloured Lego™ or coloured blocks
- Whiteboards and whiteboard pens
